

CK  POWER®

ENGINE

REFURB/REPLACEMENT PROGRAMS

AN ALTERNATIVE TO TIER 4

As Tier 4 is upon us, many customers are looking for an alternative to keep their existing equipment/fleets running while not converting to Tier 4 Final. CK Power has an alternative for you, Refurb/Replacement Programs.

These programs can range from an engine swap to a full refurb of your existing equipment/fleet. These programs include a new engine not a remanufactured engine and a new factory warranty. This allows the customer to utilize their existing equipment while staying in compliance with EPA regulations.

What is a replacement engine?

A replacement labeled engine is a new engine from the factory with a new warranty. This can be ordered to match existing engine option codes or CK Power can make those changes for you. This is a cost effective way to keep your engine without having the expense of a final tier 4 product.

Benefits of a replacement engine

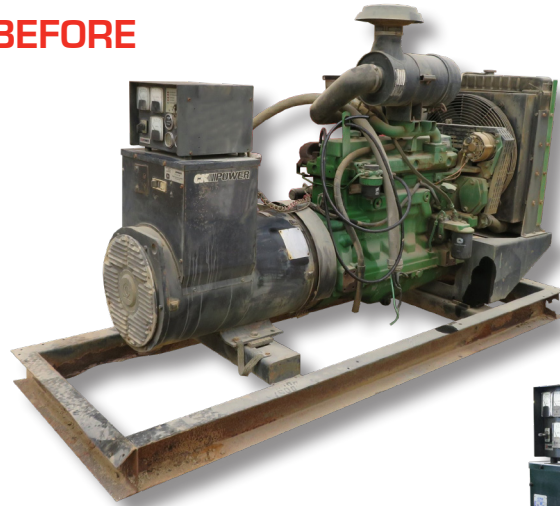

- This is a new engine not a remanufactured engine.
- This comes from the factory with a new 2yr/2,000 hour warranty.
- John Deere replacement engines can be ordered to match core engine option codes.
- Customer can keep existing control panel, radiator, air and exhaust systems.
- A more cost effective solution than purchasing a final tier 4 unit.
- Customer can use in stock replacement engines for faster lead times.
- Comes complete with oil, water and fuel systems.
- Replacement engines come with rotating electrical, water pump, injection pump and ECU if equipped.

Why refurb?

- Provides ongoing EPA acceptable source for Tier 2 & Tier 3 powered generators
- CK Power genuine parts and labor
- Lower cost & extended life alternative
