## **CK Power Opens New Arizona Facility to Strengthen OEM, Dealer, and Aftermarket Support in Underserved Region**

*Phoenix, AZ* — CK Power, a leading provider of power generation solutions, is proud to announce the opening of its new facility in Phoenix, Arizona. This expansion supports the company's growing Kubota Engine territory, reinforces CK Power's commitment to its dealer network, and brings localized engine and generator expertise to one of the Southwest's most underserved markets.

As a [Kubota Engine Distributor](#), CK Power is investing in infrastructure that enables better service to OEM customers integrating Kubota engines into their equipment and provides improved support for a growing regional dealer network. By placing resources closer to where they're needed, the new Phoenix location ensures faster access to parts, expert technical service, and deeper collaboration across industries such as power generation, construction, and [aggregates](#).

"Our new Arizona facility is a strategic step in advancing regional support for our OEMs and dealer partners," said J.J. Costello, Co-CEO at CK Power. "It strengthens our ability to provide responsive, knowledgeable service while reinforcing our long-standing commitment to growing the Kubota brand in the Southwest."

The new facility is located at 405 S 7<sup>th</sup> Street, Phoenix, Arizona 85034, providing convenient access for customers throughout the region.

The facility will also expand CK Power's support for its CK Power generator line, many of which are powered by Volvo Penta engines. With its new designation as a [Volvo Penta Certified Uptime Dealer](#), CK Power is now able to deliver faster diagnostics, reduced downtime, and factory-authorized service on-site, benefits that will directly impact customers in the field.

In addition to brand-specific support, the Phoenix location will serve as a regional hub for [multi-brand engine, generator, and equipment service](#), along with expanded warehousing and direct shipping capabilities. Customers can expect streamlined parts availability, hands-on expertise, and reduced equipment downtime, all backed by CK Power's reputation for quality and responsiveness.

This expansion underscores CK Power's long-term growth strategy, focused on supporting OEM integration, expanding aftermarket services nationwide, and providing regionally embedded support for its Kubota dealer network and CK Power generator customers.

### **About CK Power**

CK Power, a division of the CK Power Family of Companies, is a national leader in power generation, engine distribution, and manufacturing. For nearly 100 years, CK Power has delivered customized power solutions, service, and support that meet customer needs and exceed expectations. From generator

systems and OEM engine integration to aftermarket parts and service, CK Power continues to set the bar in power generation and industrial innovation.
